

## Only Meridian supports SCORM fully — from development to delivery.

# SCORM Solutions

Meridian KSI has been an innovator on the forefront of the Shareable Content Object Reference Model (SCORM) specification ever since its January 2000 introduction. The **Meridian KSI Knowledge Centre™** was the first enterprise LMS to receive SCORM certification, and the **Meridian Player** was the first-ever desktop LMS certified for SCORM 2004 conformance. Today Meridian is the only company that offers both a SCORM 2004 certified LMS and a SCORM 2004 certified offline LMS application, ensuring direct plug-and-play integration with the widest possible selection of learning materials to support your business goals.

Implementation of the SCORM specification can often be challenging, but Meridian offers a wide range of tools that not only let you manage any SCORM-conformant content more easily and efficiently, but also to

deliver that content to anyone, anywhere.

Only Meridian offers the exclusive Meridian Player, which uses SCORM to bring the benefits of online learning beyond the Internet. Now, learners with limited or restricted Web access can take SCORM conformant courseware offline and upload or import progress data to the Knowledge Centre or any other LMS, with full tracking and reporting functionality. The Meridian Player supports single- or multi-user implementations, such as a training kiosk.

One of the Knowledge Centre's SCORM tools is the **Metadata Editor**, which helps enhance content portability and reusability by identifying content type, conformance level, audience, security requirements, location, and origin. The Knowledge Centre also

includes Meridian's patent-pending **SCORM Content Manager**, a suite of straightforward Web-based tools that:

- Streamline the manipulation, definition, and association of files and content structure required for SCORM conformance;
- Create a repository of reusable content resources;
- Build new custom courses using SCORM content from any COTS or custom courseware libraries; and
- Import existing SCORM content from any source.

Meridian KSI also has extensive experience in **custom courseware development**, with over 1,500 hours of SCORM-conformant courseware and over 2,500 total courseware hours created.

SCORM and the SCORM logo are certification marks of Concurrent Technologies Corporation of Johnstown, Pennsylvania. The SCORM 2004 Compliant logo indicates that Meridian Player 3.0 has been independently tested and certified by an ADL-designated certification organization to comply with SCORM 2004. Successful test results for a product constitute AS IS compliance with SCORM 2004 using the designated tests. Compliance evaluation using SCORM 2004 tests developed by ADL or others does not constitute or imply endorsement or assurance by ADL or others of product utility, quality, or reliability in use or technical accuracy of content.
